

THE CORESHIELD™ FAMILY

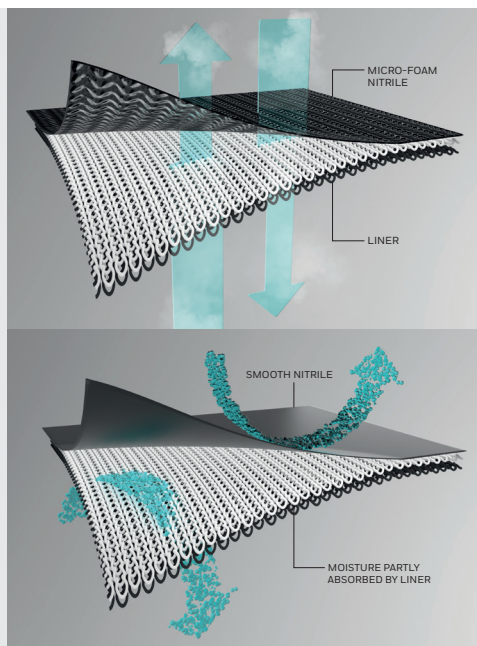

CoreShield™ 
Cut protection made simple

CHOOSE THE RIGHT CUT-PROTECTIVE GLOVES FOR YOUR APPLICATION

Superior cut protection, comfort, lightweight and durability – that's guaranteed. Additionally, would you rather need a complete range of cut protective gloves designed to simplify your selection, or do you prefer an efficient grip and great dexterity in liquid environments? CoreShield has the right solution in both situations.

CORESHIELD CUT PROTECTION MADE SIMPLE

- Cut protection from level A/A1 to F/A9.
- 22 styles with thumb reinforcement for dexterity and wear resistance.
- One of the lightest-weight cut-protective gloves on the market.
- The open cell structure provides 360° breathability.
- Silicone-free – safe to wear in painting applications.

APPLICATIONS

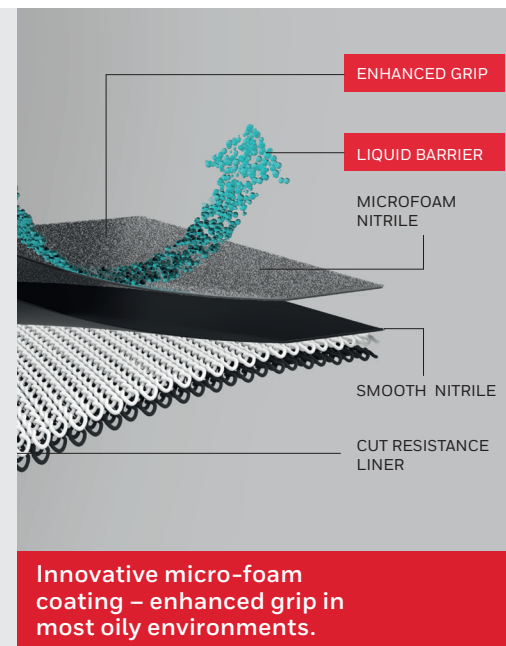

- Manufacturing
- Automotive
- Metal stamping
- Glass handling
- Construction
- Logistics

CORESHIELD DOUBLE GET A GRIP ON TOP PERFORMANCE

- Cut protection level from A/A1 to D/A4.
- Innovative micro-foam coating – enhanced grip in most oily environments.
- 100% liquid-repellent nitrile base keeps hands dry
- The special treatment prevents odors and bacteria growth on the glove (available only for the black-coated models).
- The textile looping structure is breathable.

The coating on the backhand keeps hands dry in liquid environments.

Innovative micro-foam coating – enhanced grip in most oily environments.

APPLICATIONS

- Machining operations
- Automotive assemblies
- Food handling
- Manufacturing
- Glass handling
- Metal fabrication
