

SAFETY REFINED TO MEET YOUR NEEDS

HONEYWELL OIL & GAS SOLUTIONS

The oil and gas industry operates in the world's most dangerous work environments – by far. They perform a multitude of jobs with specialized safety needs from exploration and extraction to transportation and refinement. Much of this work involves exposure to toxic gases, operating heavy machinery, as well as periods of working at heights.

According to the CDC, fatalities in the oil and gas industry are 7x higher than the national average.¹

BUILDING A FUTURE OF SAFETY THAT WORKS AS HARD AS YOU DO

For oil and gas safety managers and their workers, we believe that safety is important every second you're on the jobsite. That's why we're in the business of helping you protect your crew from head to toe with the most comfortable personal protection equipment (PPE) that works smart and works hard, just like your workers do. Honeywell oil and gas solutions are designed to ensure that safety is always on – even in the face of your most demanding projects – and have the capability to protect at every step of way from oil and gas extraction to delivery.

TYPE OF HAZARD	TOP OIL AND GAS HAZARDS				
	Highway vehicle accidents	Exposure to toxic gases	Risk of fires and explosions	Consistent exposure to heavy machinery and equipment	Working at height
A. Pipeline		✓	✓		
B. Oil Rig		✓	✓	✓	✓
C. Pump Jack		✓	✓	✓	
D. Storage		✓	✓		✓
E. Refinery		✓	✓	✓	✓
F. Transport	✓	✓	✓	✓	✓

YOUR HEAD-TO-TOE SOLUTION FOR OIL & GAS

Honeywell provides a broad range of industrial safety products to help organizations manage workplace safety in an increasingly complex world. Our comprehensive solutions include PPE for a worker's eyes, head, hearing, and hands. We also provide fall and respiratory protection and gas detection for working in oil and gas as well as first aid equipment in the case of an emergency.
