

TrustFit®

Push-In Foam Reusable Earplugs

Taking the guesswork out of how to insert your hearing protection

Reusable

Designed to be reused for up to 5 days with proper care and use.

Push-in Foam

No-roll foam. With a foam tip and dimpled design, TrustFit Pod takes less force to push into your ear canal to get a reliable seal and good fit.

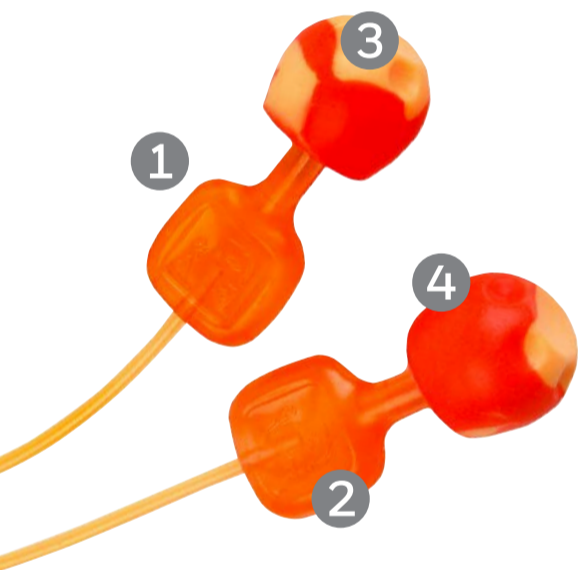

Fit

Easy insertion, great fit. Fitting ear canals of all shapes and sizes doesn't have to be difficult. TrustFit gives workers a personalized fit every time for all-day comfort.

Protection

Hearing protection only works when people use it. With a 28-dB NRR, TrustFit Pod provides the right amount of protection across a broad range of industries without compromising overall employee safety.

- 1 High attenuating reusable earplug: NRR = 28dB, Canada Class A(L)
- 2 Ergonomically contoured stem for easy insertion
- 3 Soft polyurethane foam with patented dimpled tip
- 4 Bright orange color for easy visual detection

Noise-induced Hearing Loss (NIHL) is the most common permanent and preventable occupational injury

22 mil.

U.S. workers are exposed to hazardous noise each year

24%

of hearing loss among workers is caused by occupational exposures

34%

of noise-exposed workers report not wearing hearing protection

CAUSES

Continuous, long-term exposure to sounds at or exceeding 85 decibels
One-time impulsive exposure over 140 dB peak

TOP INDUSTRIES WITH NOISE HAZARDS

AGRICULTURE

CONSTRUCTION

OIL & GAS

MANUFACTURING

TRANSPORTATION

MINING
